CRIMINAL JUSTICE TRENDS

➤ Accuracy of November 2016 forecast

- **Admissions** since the November conference totaled 6,989—345 less than projected for an error of -4.7% percent. (Page 1)
- The **end-of-month population** on January 31st was 97,477. This was 554 under the projected 98,031 (-0.6% error). (Page 1)
- Nearly 96.0 percent of November through January admissions were new commitments, and the percentage error was higher for this group than for all admissions. There were 6,692 new commitments, 341 fewer than projected (-4.8% error). The number of conditional and control release violators returned to prison with technical violations was 4 fewer than projected (-1.3% error). (Page 2)

➤ Crime

- The number of index offenses decreased in 2015 by 10,773 (-1.6%) from the 2014 level of 673,145. The 662,372 index crimes reported in 2015 was lower than reported in any year since 1978. This is the seventh year in a row in which index offenses declined after three years of increases. (Page 3)
- The number of **reported violent offenses** increased by 2.6 percent in 2015. Violent offenses, which include murder, forcible sexual offenses, robbery, and aggravated assault, were 14.1 percent of all index offenses in 2015, up from 13.5 percent in 2014. Non-violent index offenses include burglary, larceny, and motor vehicle theft. These decreased by -2.3 percent in 2015. Note that drug related offenses are not included in index offenses. (Page 4)
- Data for the **first six months of 2016** indicate that the number of **reported crimes** has continued to decline. The number of total index crimes decreased by -3.4 percent in the first six months of 2016 compared to 2015. The number of violent crimes decreased by -3.2 percent declining to 44,972. Nonviolent crimes decreased by -3.4 percent. (Page 5)
- The crime rate fell from 3,450.7 in 2014 to 3,342.7 in 2015 (-3.1%). This decline is less than observed in 2014 when the crime rate fell by -4.9 percent. (Page 6)
- 2015 **arrests** declined by -10.8 percent, from 866,939 in 2014 to 773,037 in 2015. Arrests for index offenses declined by -3.4 percent in 2015 while arrests for non-index crimes decreased by -12.5 percent. The largest percentage decrease in index offense arrests was in burglary (down -9.6%). The only increase in index offense arrests was in motor vehicle theft (up 17.5%). (Pages 7-8)
- Arrests for the **first six months of 2016** were down -3.4 percent from 2015. (Page 5)

➤ Filings and Guilty Dispositions

- After essentially no change in 2011, the number of **felony filings** has declined over the last five years. The number of filings declined by -2.0 percent in 2012, by -6.7 percent in 2013, by -5.6 percent in 2014, by -2.0% in 2015, and by -2.4% in 2016. (Pages 9 and 15)
- **Violent** offense filings decreased by -2.3 percent in 2016 and **nonviolent** offense filings declined by -4.3 percent. During the same period, **drug** filings increased by 1.4 percent. (Pages 10 and 11)

- The share of **violent** filings in 2016 experienced no change from the prior year, remaining at 20.3 percent of all filings. The share of filings that are **nonviolent** decreased from 52.7 percent in 2015 to 51.6 percent in 2016, while the share of **drug** filings increased from 27.0 percent to 28.1 percent. (Pages 10 and 11)
- After three years of large increases, the number of **guilty dispositions** increased by just 1.2 percent in 2008 and has decreased in each of the subsequent years through 2015. In 2016, guilty dispositions experienced essentially no change from 2015. (Pages 12 and 15)
- **Violent** offense guilty dispositions increased by 1.5 percent and **nonviolent** offense guilty dispositions declined by -1.8 percent in 2016 over 2015. During the same period, drug guilty dispositions increased by 2.7 percent. (Pages 13 and 14)
- The share of guilty dispositions for **violent** offenses increased from 17.7 to 18.0 percent between 2015 and 2016. The share for **nonviolent** offenses decreased and the share for **drug** offenses increased. (Pages 13 and 14)
- The percent of **guilty dispositions which are imprisoned** as new commitments has trended upward from less than 16 percent in the late nineties to 23.3 percent in 2009. The percentage fell for three years but then increased through 2014. Since then, there have been two years of declines, with a decrease to 21.5% in 2016 (down from 22.6% in 2015). (Page 16)

➤ Prison Admissions

- There were 29,702 **admissions to prison** in 2016, down -4.7 percent from 2015. This continues the decline observed the previous two calendar years after one year of increasing admissions. (Page 24)
- **New commitments**, which are close to 96.0 percent of all admissions, totaled 29,652 in FY 15-16. This represented a -2.1 percent decrease from the prior fiscal year. New commitments also decreased in the prior two fiscal years. (Page 25)
- In looking at new commitments by calendar year, new commitments in 2016 decreased by -4.8 percent from the previous calendar year. New commitments have now decreased over three calendar years. (Page 26)
- **Conditional and control release violators without new sentences** comprise the remaining 4.4 percent of total admissions. These admissions decreased in 2016 by -1.7 percent, lower than the -3.9% decrease in the previous calendar year. (Page 27)
- **New commitments** moved to a new level in March 2003 at the beginning of **zero tolerance**. They trended down after late 2008, but remained above 2,600 each month from February 2014 through October 2014. New commitments have been between 2,100 and 2,600 for the last six months and have not reached the same highs as they did in 2015. (Page 28)
- Offenders sentenced to prison for **technical violations** in FY 15-16 decreased by -2.8 percent from the prior fiscal year. This was the first fiscal year decrease in technical violators after three years of increases. The first seven months of FY 16-17 indicate a -22.0% decrease compared to those same months in FY 15-16. (Page 29)
- After a three-year period during which **technical violators as a percentage of total admissions** averaged 29.1 percent (and exceeded 30 percent in 12 months), this percentage fell to 24.0 percent in FY 07-08. Since then, the percentage has averaged between 18.9 percent and 20.6 percent. In FY 15-16, technical violators as a percentage of total admissions was 20.4 percent, down from 20.6 percent in

FY 14-15. The first seven months of FY 16-17 (17.5%) also seem to be smaller than the same months in FY 15-16 (20.9%). The post-zero tolerance percentages have remained well below pre-zero tolerance levels. (Page 30)

- The percentage of supervision revocations due to technical violations who are sentenced to prison has decreased in FY 15-16 after three years of increases. In FY 11-12, 30.4 percent of technical violators were sentenced to prison, but by FY 14-15 it had reached 33.7 percent. As of FY 15-16, it has dropped to 33.1 percent sentenced to prison. The first seven months of FY 16-17 continued this downward trend with 29.7 percent sentenced to prison. (Page 30)
- After a one year decline, the average **sentence length** of new commitments increased for two consecutive years, reaching 63.3 months in 2016, up from 62.3 months in 2015. (Pages 31 and 32)
- In January 2017 the average **sentence length** of new commitments was 56.1 months (4.7 years). (Pages 32 and 33)
- While large numbers of new commitments are sentenced to prison with short sentences, there are often shifts in the **sentence length distribution**. Total new commitments decreased by 626 (-2.1%) in FY 15-16 from the prior fiscal year with the largest decreases being in sentences from 367 days to 15 months in length and 58 to 78 months in length. Year-and-a-day sentences decreased by 42 (-1.8%) while sentences greater than 102 months increased by 146 (3.7%) in FY 15-16. More recent data tells a similar story. In the first seven months of FY 16-17, new commitments declined by -7.0 percent and year-and-a-day new commitments decreased by -2.2 percent. (Page 34)
- As noted above, the **number of year-and-a-day new commitments** fell by -1.8 percent in FY 15-16. This was the second consecutive year decrease following a one year increase after six years in which the number of year-and-a-day commitments fell dramatically. By calendar year, the number of year-and-a-day new commitments decreased in 2016 by -0.3% over 2015. (Page 35)
- The **percentage of year-and-a-day sentences** also remained stable in FY 15-16, with 7.6 percent of new commitments having year-and-a-day sentences, the same as in FY 14-15. On a calendar year basis, 2016 showed 7.8 percent of new commitments with year-and-a-day sentences, an increase from 7.5 percent in 2015. (Page 36)
- While **year-and-a-day sentences** decreased statewide in the first seven months of FY 16-17, these trends differed across counties. The largest decrease was in Polk County where these sentences decreased by -45.4 percent. Miami-Dade (-18.0 percent) and Taylor (-76.6 percent) also experienced large decreases. Year-and-a-day sentences increased by more than 10 in six counties. (Page 37)
- There has been an increase in **year-and-a-month** sentences in **Hillsborough County** since November 2007. These increases were in conjunction with a large decline in **year-and-a-day sentences**. Hillsborough's percentage of total new commitments that are either year-and-a-day or year-and-a-month in length declined after October 2006, remained stable for a couple of years and trended upward before stabilizing once again in the last two fiscal years. Looking at both of these short sentences suggests that the earlier decline observed in year-and-a-day sentences did not represent as great a change in sentencing behavior as one might initially assume. Data for FY 15-16 and the first seven months of FY 16-17 suggest that year-and-a-day sentences still represent a large share of these short sentences. Data suggest that Pinellas County started using the year-and-month sentence as an alternative to year-and-a-day sentences beginning in 2010. More recent data for Pinellas County indicate relative stabilization in both sentencing types, with a large share of year-and-a-month sentences. (Page 38)
- **Growth in new commitments** is not uniform across the state. Comparing July through January of FY 15-16 and FY 16-17, 43 counties experienced negative growth in the number of new commitments and 24 counties showed positive growth. Between FY 14-15 and FY 15-16, 40 counties experienced negative growth in new commitments and 27 counties showed positive growth.

- Duval County had the largest **number of new commitments** from July through January of FY 16-17 (1,087, 6.8% of total). Hillsborough's new commitments accounted for 6.7 percent of the state total in this same time period, up from 5.4% in the first seven months of FY 15-16. New commitments from Polk County accounted for 5.6 percent of the total (down from 5.7%). Broward's new commitments accounted for 5.6 percent of the total (down from 7.4 percent). (Page 39)
- Broward County led the state in the number of **declines in new commitments** in the first seven months of FY 16-17 with new commitments decreasing from 1,265 in FY 15-16 to 893 in FY 16-17 (-29.4%). Miami-Dade and Duval also had decreases of 100 or more in new commitments. Volusia and Marion had decreases of 90 or more. (Page 40)
- Even with a statewide decrease in admissions (-7.0%), twenty-four of Florida's counties sent more new commitments to prison in the first seven months of FY 16-17 than in FY 15-16. Hillsborough sent 135 more new commitments to prison (14.6% increase), Alachua sent 123 more new commitments (41.7% increase), and Leon increased by 95 (25.3%) during these months. (Page 40)
- Florida's three **largest counties**, Miami-Dade, Broward, and Palm Beach, accounted for 29.5 percent of the state population in 2016, but only 16.9 percent of the state's new commitments to prison in FY 15-16 and 22.3 percent of the year-and-a-day sentences. On the other hand, Bay County accounts for 0.9 percent of the state's total population, but accounts for 3.2 percent of new commitments. Similarly, Hillsborough County accounts for 6.7 percent of the state's total population, but accounts for 14.0 percent of the year-and-a-day sentences, and though Volusia only represents 2.6 percent of the state population, it accounts for 10.8 percent of year-and-a-day sentences. Jackson and Taylor counties each sentenced roughly one out of every four new commitments to a year-and-a-day sentence, while Gulf sentenced a little over one out of every three to a year-and-a-day sentence. (Pages 41 and 42)
- The -7.0 percent decrease in new commitments from July through January of FY 16-17 was not evenly distributed by **offense group**. The largest decrease in terms of raw numbers was in the "**Property Theft/Fraud/Damage**" category, decreasing by 413 (-14.1%) between these time periods in FY 15-16 and FY 16-17. "**Drug**" offenses decreased by 306 (-7.9%) and "**Burglary**" offenses decreased by 268 (-9.6%). "**Weapons**" offenses increased by 105 (11.2%). (Page 43)
- Decreases in new commitments in the "**Property Theft/Fraud/Damage**" category were distributed across many offenses, with the largest decrease being in "**Traffic in stolen property**" where there were 147 (-15.2%) fewer in this time period between fiscal years. "**Grand theft (GE \$300/LT \$5,000)**" decreased by 114 (-18.9%). (Page 44)
- Declines in new commitments within the "**Drug**" offense category were also distributed across many offenses, with the largest decrease being in "**Cocaine Possession**" where there were 64 (-12.2%) fewer in the first seven months of FY 16-17. "**Cocaine S/M/D**" also decreased by 47 (-6.5%), and "**Possess controlled substance (other)**" decreased by 45 (-12.7%). "**Possess heroin under 10 grams**" saw an increase of 32 (100%). (Page 45)
- In the "**Burglary**" category, "**Burglary of an occupied dwelling**" decreased by 149 (-10.3%) in the first seven months of FY 16-17. "**Burglary of an unoccupied structure**" decreased by 82 (-11.0%). (Page 46)
- Offenses related to "**Possession of a firearm by a convicted felon**" contributed most to the increase in the "**Weapons**" category, increasing by 84 (10.7%). (Page 47)
- Decreases in the "**Property Theft/Fraud/Damage**" offense category for **year-and-a-day sentences** accounted for the largest share of the decrease in these sentences between the first seven months of FY 15-16 and FY 16-17. New commitments with a "**Property Theft/Fraud/Damage**" primary offense fell by 31 (-9.2%). The "**Burglary**" offense category also showed a decrease of 25 (-14.9%). "**Weapons**" increased by 20 (48.8%). (Page 48)

- New commitments with **year-and-a-day sentences** have a wide variety of offenses. In July through January of FY 16-17, “**Grand theft, \$300 - \$4,999**” and “**Burglary of an unoccupied structure**” were the most common primary offenses. These two offenses accounted for 13.3 percent of the total year-and-a-day new commitments in this time period (down from 14.4% in the first seven months of FY 15-16). (Page 49)
- The **year-and-a-day offense** with the largest decrease in the number of new commitments between these time periods in FY 15-16 and FY 16-17 was “**Cocaine possession.**” There were 20 fewer year-and-a-day offenders with this offense, a decrease of -22.5 percent. “**Burglary of a dwelling**” declined by 16 new commitments (-25.8%) and “**Grand theft, \$300 - \$4,999**” decreased by 12 new commitments (-12.2%). Increases in new commitments occurred for “**Possess methamphetamine**” (27, 61.4%) and “**Possession of a firearm etc. by convicted felon**” (17, 56.7%). (Page 49)
- The **percentage of new commitments sentenced for third degree felonies** decreased from 44.0 percent in 2015 to 43.4 percent in 2016. (Page 50)
- The percentage of diversion eligible offenders sentenced to prison who committed a felony following the passage of CS/SB 1722 declined from 2.6 percent in FY 09-10 to 1.8 percent in FY 14-15. In FY 15-16, this percentage rose slightly to 2.1 percent. In the first seven months of FY 16-17, this percentage fell to 1.5 percent. (Page 51)
- The number of offenders sentenced to prison under **10-20-Life** declined in FY 15-16 for a third consecutive year. In FY 15-16, 1,254 offenders sentenced under these provisions received mandatory prison terms with 12.2 percent receiving a sentence at least 25 years in length, down from 13.4 percent in FY 14-15. (Pages 52 and 53)
- While the number admitted each year under 10-20-Life has declined, the total affected prison population continues to grow. On June 30, 2016, there were 10,925 offenders who had received a mandatory prison term under this statute in Florida’s prisons. (Pages 52 and 53)

➤ COUNTY JAILS

- **Average daily population** in county jails increased after the implementation of zero tolerance. The adjusted June 2016 average daily population (ADP) of 53,536 was -0.7 percent lower than the adjusted June 30, 2015 ADP of 53,892. At the peak of zero tolerance, the ADP exceeded 66,000 (July 2007). (Page 54)
- The **adjusted average daily population** has been below 60,000 since December 2009. (Page 55)
- In FY 14-15, an average of 18.5 percent of the **offenders in county jail had been sentenced for a felony**. In FY 15-16, an average of 19.3 percent of the **offenders in county jail had been sentenced for a felony**. However, in the first three months of FY 16-17, an average of 18.7 percent of the **offenders in county jail had been sentenced for a felony**. (Page 56)

➤ OTHER TRENDS

- After increasing from 112,547 in December 2005 to 121,594 in December 2008, the number of offenders on active supervision fell over the next three years to 114,492 in December 2011. The number on active supervision grew in 2012, but then declined for another four years and was 106,764 on December 31, 2016 (down -2.1% from the prior year). (Page 57)

- The number of offenders with either a life or a death sentence has grown over the last twenty-five years increasing from 4,549 in 1990 to 13,466 in 2016. In 1990, 10.6 percent of inmates were serving a life or death sentence on June 30. In 2016, this percentage had increased to 13.6 percent. (Page 58)
- The prison population on June 30, 2016 was 99,119, a decrease of -0.9 percent from June 30, 2015. (Pages 59 and 61)
- The number of **prison inmates per 100,000 Florida population** fell in FY 15-16 to 491.9. This is the sixth year in a row in which the incarceration rate declined. In the prior 30 years, the incarceration rate had grown from 202.3 (in FY 79-80) to 543.7 (in FY 09-10). This rate had remained relatively flat between FY 94-95 and FY 01-02, but had risen each year between FY 02-03 and FY 09-10. (Pages 59 and 60)
- The **age distribution of prison admissions** has changed significantly since FY 99-00. While the percentage of 18 to 24 year olds has declined, the percentage of those older than 50 has grown steadily. (Page 62)
- The **age distribution of the prison population** has also changed significantly since June 30, 2000. While the percentage of 18 to 24 year olds has declined, the percentage of those older than 50 has grown steadily, with inmates aged 50 to 59 now making up a greater share of the prison population than 18 to 24 year olds. (Page 63)

Source: Monthly status file of prison population prepared by Bureau of Research and Data Analysis, Department of Corrections. This file contained 97 percent of new commitments, however county of commitment is sometimes missing. According to DOC, offenders entering prison near the end of the the month may not have this information available by the time the status file is run at the end of the month. It was assumed that these missing data would not bias the county of commitment distribution. Therefore, these numbers were inflated to match new commitment totals.

Source: Monthly status file of prison population prepared by Bureau of Research and Data Analysis, Department of Corrections. This file contained 97 percent of new commitments however sentencing details are often missing. According to DOC, offenders entering prison near the end of the month may not have this information available by the time the status file is run at the end of the month. It was assumed that these missing data would not bias the primary offense distribution. Therefore, the primary offense distribution was adjusted to match new commitment totals for this analysis.
